

Inquiry Initiative 2

Teacher Retention

The analogy of a leaky bucket is often used to describe the state of teacher retention. Although recruitment is often the focus of our teacher shortages, we cannot continue to pour water into a leaky bucket. As teacher educators, join us in identifying the holes and cracks that cause our educators to leave the profession. Inquiry Initiative II will:

- Consider the role of teacher education in teacher retention
- Affect change in public perception (reclaim the narrative)
- Understand our kuleana to implement & share findings

Timeline*

- Summer 2023
Washington DC
- Annual 2024
Anaheim
- Summer 2024
Denver
- Annual 2025
New Orleans
